Super Star apps - iOS & Android - free

We are now pleased that our free iOS (iPad & iPhonie) app has been approved and is now ready for download from the Apple App Store. Search for Super Star Online or Super Star Phonics. You can also use our link from our web site at http://helpme2learn.com/school/apps to download our iOS app or Android app.

The purpose of these apps is to make it easier for young students to access our courses using an iPad or Android device. This app allows you to enter the unique identifier (the last part of the URL or link for you Super Star Online subscription), the students user name and password and save it. Next time the student (or teacher) opens the app, they can go straight to their courses. This app can be used at school or home.

Important - Please note that these apps only work on our HTML5 courses and will not work on our Flash courses. Our HTML5 courses are: Silly Pictures, Beginning Reading with Phonics, Phonics 1a and Phonics 1b. Teachers can also access our Teachers and Admins Resources course.

These apps do require a subscription to Super Star Online. We do have two iOS apps and one Android app that can be installed on a device http://helpme2learn.com/school/apps . These apps are lessons from our Beginning Reading with Phonics course and the cost is 99 cents.

Silly Pictures is now available HTML5

I am very pleased to announce that Silly Pictures is now available in HTML5. You have noticed this from above. This means that you can access Silly Pictures on iPad, iPhone and Android devices without a Flash Browser. We are currently working on converting Silly Sentences to HTML5 and we expect that to be completed soon.

Super Star Movies

We are also working on a new course, primarily for classroom teachers called Super Star Movies. We are taking all of our presentations and putting them in a movie player that will allow teachers to project our movies to the class from a computer and projector. The teacher can then select the movies they want to play for the class and those movies will play automatically. The teacher can select one movie or several movies to play automatically without stopping.

Our presentations by our Super Star Kids and coaches are very powerful. Our animations do a great job of explaining the concepts that we are presenting. Some of our presentations are interactive and I believe that is the best form of our presentations, but sometimes a teacher needs something for the class to watch while doing other work or working with other students. Our movies will give them that option. All of the interactive portions are done automatically, so the teacher does not need to click on anything while the movies are running. We even have a timer to show the teacher how long the movies will run.

Super Star Movies is available in HTML5.

We are still working on Super Star Movies, but we have enough that you can start using them, if you are interested. Let me know that you are interested and I will add them to your Teacher Resources class along with your Teacher and Admins Resources course.. You can e-mail me at dan@helpme2learn.com and let me know that you would like me to add the movies to your subscription (free).

The current movies are:

<u>Super Star Movies</u>
